Abstract of JP 8069440 (A)

PURPOSE: To request a desired file process through a small number of operations without any mistake. **CONSTITUTION:** The name of the desired file is collated with the latest file name list obtained by one of the central processing unit CPUs 1-3 of the computers in a 1st computer group and when it is decided the desired file is present, a file processing request is sent to one of file management machines MCN4 and MCN5 in a 2nd computer group including a storage device DISC4 or DISC5 storing the file with the desired file name.
